

REVOLUTIONIZING THE CONSTRUCTION INDUSTRY

WHAT IS TECHNO METAL POST?

Techno Metal Post simplifies life by providing an alternative foundation solution, that can be installed in most soil conditions. Our product is a helical pile, that is screwed into the ground until it reaches the appropriate load-bearing capacity to support all types of structures. Our piles are installed by our team of certified professionals, using machines specially designed for pile installation. What's more, our unique and exclusive green sleeve slides along the pile in response to ground movements, ensuring its stability during freeze and thaw cycles.

« I've installed the helical piles on many of my shows and I just recently installed them in my own home. Great experience, great team and a great product. »

TECHNO METAL POST

THE ADVANTAGES

SIMPLE & QUICK

Techno Metal Post’s helical piles can be installed within just a few hours. Since no excavation and/or concrete is required, you can start building as soon as the helical pile installation is completed.

EASY ACCESS IN TIGHT SPACES

Our compact and powerful machines ensure unmatched installation quality. The smallest machine, having a width of only 75cm (29 inches), can manoeuvre through challenging and hard-to-reach places and fit through doorways, or install piles on sloping terrain.

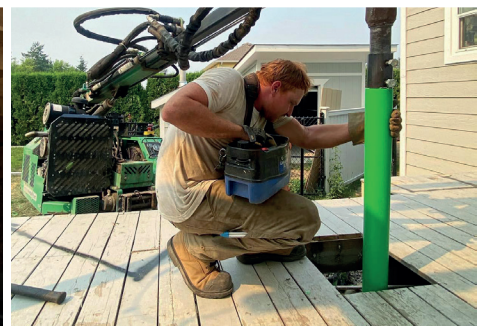

STABILIZATION OF EXISTING STRUCTURES

Needing a new foundation for your deck? Our specialized machines and various installation techniques, that we’ve developed over the years, enable us to install piles under your existing structure. Your deck has never been more solid!
